The Meller Flow Trans Companies give you complete solutions for tank and silo discharge applications. We are part of the Flow Trans Group BV, a holding company owned by Vado Beheer BV in The Netherlands.

Vado Beheer BV is an investment company owned by the Van Doorne family (founders of DAF trucks, Nedcar and Van Doorne's Transmissie).

Core activity is the management of a portfolio of majority interests in industrial and trading companies in The Netherlands and Belgium with a joint turnover of approximately one billion euros. The policy of VADO is aimed at continuity. At the same time VADO greatly values the technological lead of the companies in her portfolio. This means that ample room is made available to the companies to make the necessary investments for their future.
